

PAKISTAN STUDIES

Complete Notes: Week 5 – Week 10

Exam-Ready Study Guide with Cheat Sheet

Topics Covered:

- Week 5 → Democracy in Pakistan (1947–Present)
- Week 7 → Politics of New Provinces & Local Government Systems
 - Week 8 → Neo-Liberal Governance & Poverty
 - Week 9 → Obstacles to Economic Development
- Week 10 → Foreign Policy & Strategic Significance

WEEK 5 — DEMOCRACY IN PAKISTAN (1947–PRESENT)

1. What is Democracy?

Democracy = Rule of the people. From Greek: Demos (people) + Kratos (rule). Pakistan operates under the 1973 Constitution with a parliamentary system.

Core Principles (Must Know)

- Popular Sovereignty – People are the ultimate source of authority
- Rule of Law – Law applies equally to everyone
- Constitutional Supremacy – No institution above the Constitution
- Separation of Powers – Executive, Legislature, Judiciary work independently
- Political Pluralism – Opposition parties allowed and respected
- Accountability & Transparency – Government decisions can be questioned

Types of Democracy

- Direct Democracy – Citizens vote on laws directly (e.g., Swiss referendums) — Not feasible in Pakistan
- Representative Democracy – Citizens elect representatives → National Assembly, Senate, Provincial Assemblies
- Social Democracy – Economic justice + political rights (e.g., Ehsaas Program under Imran Khan)

2. Historical Timeline of Pakistani Democracy

A. Early Years (1947–1958)

Pakistan inherited refugee crisis, weak economy, Kashmir War, and lack of experienced administrators. Jinnah emphasized equality, parliamentary democracy, and religious freedom — but died in 1948 creating a leadership vacuum.

Key Fact: 6 Prime Ministers in 7 years after Liaquat Ali Khan's assassination (1951)

- 1956: First constitution — Pakistan became Islamic Republic with parliamentary system
- 1958: Iskander Mirza abrogated constitution → Ayub Khan imposed Martial Law = First democratic breakdown

B. Ayub Khan Era (1958–1969)

- 1962 Constitution — Presidential system introduced
- Basic Democracies system — 80,000 elected Basic Democrats = electoral college for President
- Economic growth but political repression; East Pakistan marginalized
- Mass protests forced Ayub Khan's resignation

C. Yahya Khan & 1971 Breakup

- 1970 elections held — Sheikh Mujibur Rahman (Awami League) won majority
- Power NOT transferred → Civil war → Bangladesh created

💡 *This is Pakistan's biggest democratic failure — results ignored = country split*

D. Bhutto Era (1971–1977) — ZAB

- MAJOR ACHIEVEMENT: 1973 Constitution — Parliamentary system, fundamental rights, federalism
- Negatives: Centralization of power, opposition suppression
- 1977 election controversy → Military coup by Zia-ul-Haq

E. Zia-ul-Haq Era (1977–1988)

- Martial Law + Islamization policies
- 8th Amendment — President could dismiss PM (weakened democracy structurally)
- Zia died in plane crash 1988 → Elections restored civilian rule

F. Decade of Democracy (1988–1999) — Fragile but Recurring

4 governments dismissed in this decade due to Article 58(2)(b), civil-military imbalance, corruption allegations.

PM	Tenure	Key Achievement	Why Dismissed
Benazir Bhutto (1st)	1988–1990	Civil liberties, women police stations	President's dismissal powers
Nawaz Sharif (1st)	1990–1993	Privatization, market reforms	Clash with President GIK
Benazir Bhutto (2nd)	1993–1996	Telecom expansion, energy projects	Dismissed by Farooq Leghari
Nawaz Sharif (2nd)	1997–1999	13th Amendment, nuclear tests 1998	Coup by Musharraf 1999

 *Democracy functioned electorally but NOT institutionally in this decade*

G. Musharraf Era (1999–2008)

- Centralized rule, 17th Amendment
- 2007: Judicial crisis → Lawyers' Movement demanding restoration of judiciary
- 2008 elections restored democracy

H. PPP Government (2008–2013) — Asif Ali Zardari

- 18th Amendment (2010) — Most important democratic reform:
 - Parliamentary supremacy restored
 - Provincial autonomy strengthened
 - Presidential powers reduced
 - Concurrent Legislative List abolished
- First government to complete full 5-year term

I. PML-N Government (2013–2018) — Nawaz Sharif

- CPEC projects launched, energy improvements
- Panama Papers → Nawaz disqualified by Supreme Court

J. PTI Government (2018–2022) — Imran Khan

- Welfare reforms (Ehsaas), anti-corruption drive
- IMF negotiations, political polarization
- Removed via no-confidence vote 2022

K. PDM Government (2022–2023) — Shehbaz Sharif

- IMF stabilization, managed 2022 flood crisis
- Severe inflation crisis

L. 2024 Elections & Current

- Coalition formed → Shehbaz Sharif became PM again
 - Ongoing: economic crisis, political polarization, institutional tensions
-

3. Structural Problems of Pakistani Democracy

- Military influence over civilian governments
- Weak party democracy — parties family-run, not institutionalized
- Judicial activism — courts interfering in politics
- Economic instability undermining governance
- Elite dominance — feudals and industrialists dominate politics
- Political intolerance — parties don't accept defeat

4. Conclusion

Pakistan's democracy has collapsed 3 times (Ayub, Zia, Musharraf) but returned through elections repeatedly. It remains resilient but fragile. Future depends on: constitutional supremacy, civilian control, economic reforms, political tolerance, and institutional balance.

WEEK 7 — POLITICS OF NEW PROVINCES

1. Current Provinces of Pakistan

- 4 Provinces: Punjab, Sindh, Khyber Pakhtunkhwa (KPK), Balochistan
- Federal Territories: Islamabad Capital Territory, Gilgit-Baltistan, AJK

2. Why Regions Demand New Provinces?

Reason	Explanation	Example
Unequal Development	Large provinces concentrate development in major cities	South Punjab lags behind Lahore
Administrative Inefficiency	Very large provinces hard to manage	Punjab = 120 million people
Cultural & Linguistic Identity	Regional languages/cultures ignored	Seraiki speakers, Hindko speakers in Hazara
Political Representation	Smaller regions underrepresented	Most Punjab CMs from Central Punjab only

3. Constitutional Framework — How to Create a New Province

Article 239(4): A constitutional amendment altering provincial limits must be approved by the Provincial Assembly of that province with a two-thirds (2/3) majority

Steps Required

- Step 1: Constitutional amendment bill introduced in Parliament
- Step 2: 2/3 majority in both National Assembly AND Senate
- Step 3: Provincial Assembly concerned also approves with 2/3 majority

💡 *This is WHY creating new provinces is very difficult — political parties disagree, provincial elites resist losing territory*

4. Historical Background — One Unit Scheme (1955–1970)

- 1955: All West Pakistan provinces merged into ONE administrative unit = 'West Pakistan'
- Purpose: Create parity with East Pakistan; reduce provincial divisions
- Problem: Sindhis, Baloch, Pashtuns felt Punjab dominated
- 1970: One Unit abolished, original provinces restored

💡 *Lesson: Centralized systems ignoring regional identities cannot survive*

5. Major Demands for New Provinces

A. South Punjab Province — Strongest Demand

- Regions: Multan, Bahawalpur, Dera Ghazi Khan, Rahim Yar Khan, Bahawalnagar
- Reasons: Higher poverty, lower literacy, fewer hospitals/universities; budget favors Lahore/Faisalabad/Rawalpindi

- Political promises: PTI promised South Punjab secretariat in 2018; PPP also historically supported
- Status: NOT yet created — no government completed constitutional process

B. Bahawalpur Province (Restoration)

- Previously a princely state with its own Nawab and administrative autonomy
- Before 1955: Maintained independent status; After 1955: Absorbed into Punjab
- Demand: Restore regional identity and improve governance

C. Hazara Province

- Region includes: Abbottabad, Mansehra, Haripur, Battagram
- Trigger: 2010 — NWFP renamed to Khyber Pakhtunkhwa (Pashtun identity)
- Hazara people speak Hindko (not Pashto) — felt excluded from provincial identity
- Large protests occurred, some protesters killed in clashes

D. Seraiki Province

- Based on linguistic identity — Seraiki spoken in southern Punjab districts
- Argument: Pakistan has language-based provinces (Sindhi, Pashto) → Seraiki deserves same

E. Urban Sindh / Muhajir Province

- Demand: Separate province for Karachi and Hyderabad
- Argument: Urban Sindh pays most taxes but development controlled by rural Sindh elites
- Opposition: Sindhi nationalists fear weakening Sindh's political power and ethnic division

F. FATA Merger (2018) — Successful Territorial Reorganization

- Before 2018: FATA had separate legal system under Frontier Crimes Regulation (FCR)
- 2018: FATA merged into KPK — FCR abolished, Pakistani law extended to region

💡 *FATA merger PROVES territorial reorganization is possible when political consensus exists*

6. Arguments FOR New Provinces

- Better Governance — smaller provinces easier to manage (India created Uttarakhand, Jharkhand, Telangana)
- Balanced Development — new province government prioritizes local needs
- Political Empowerment — local populations gain representation
- Strengthening Federalism — regions feel satisfied, federation becomes stronger

7. Arguments AGAINST New Provinces

- Ethnic Fragmentation — can increase divisions in already-tense regions
- Financial Costs — need new buildings, bureaucracies, courts, police forces
- Political Manipulation — politicians use issue for votes but never implement
- Administrative Complexity — too many provinces complicate federal-provincial coordination

8. Two Models

Model	Basis	Example	Advantage	Disadvantage
-------	-------	---------	-----------	--------------

Administrative	Efficiency	Divide Punjab into North/Central/South	Reduces ethnic tension, improves governance	May not satisfy cultural demands
Ethnic	Cultural Identity	Seraiki Province	Recognizes cultural rights, strengthens identity	May intensify ethnic politics

9. Impact of 18th Amendment (2010)

- Strengthened provincial autonomy — more financial resources, more authority
- Effect: Smaller regions now feel even STRONGER motivation to demand their own provinces

10. Key Reality Check

 Despite strong debates, NO new province has been created in Pakistan since 1970. Main reason = lack of political consensus and constitutional agreement

WEEK 7 — LOCAL GOVERNMENT SYSTEMS OF PAKISTAN

1. What is Local Government?

Third tier of governance (after Federal and Provincial). Functions at district, municipal, town, village, and union council levels.

Key Functions

- Water supply, sanitation, waste management
- Local roads, street lighting, parks
- Local schools, libraries, basic health facilities
- Local markets and business regulation

💡 *If a streetlight isn't working — report to Union Council, NOT federal government*

Democratic Significance

- Encourages citizen participation
- Improves transparency and accountability
- Develops future political leadership — many national leaders start here

2. History of Local Government

British Period

- Lord Ripon 1882 — 'Father of Local Self-Government in India'
- Objective: Reduce admin burden, manage urban services, incorporate local elites
- System remained centralized — Deputy Commissioner (DC) supervised, approved budgets, overrode decisions
- Separate systems: Urban (municipal committees/corporations) vs Rural (district boards/union boards)

After Independence (1947–1958)

- Inherited colonial system — remained weak
- Provincial government controlled, limited financial autonomy, strong bureaucratic supervision

3. Three Major Local Government Systems

System 1: Basic Democracies Order 1959 (Ayub Khan)

- 4-tier structure: Union Councils → Tehsil Councils → District Councils → Divisional Councils
- ~80,000 Basic Democrats elected nationwide
- KEY FUNCTION: Basic Democrats also served as Electoral College for Presidential elections
- Bureaucracy still dominant — DC could suspend resolutions, approve development plans
- Criticism: Centralized power in presidency, used to legitimize authoritarian rule

💡 *Ayub used local democracy to legitimize military rule — not genuine democracy*

System 2: Local Government Ordinance 1979 (Zia-ul-Haq)

- Rural: Union Council → Tehsil Council → District Council
- Urban: Town Committees → Municipal Committees → Municipal Corporations → Metropolitan Corporations

- Local taxation powers: property tax, toll tax, service fees
- Limitation: Provinces could still suspend, dissolve councils, control development budgets

System 3: Local Government Ordinance 2001 (Musharraf) — Most Ambitious

- Called: Devolution of Power Plan
- Objective: Transfer political, administrative, and financial authority from provinces to districts
- 3-tier structure: Union Council → Tehsil/Town Council → District Council
- Abolished urban-rural administrative divide
- District Nazim (elected political head) + District Coordination Officer (DCO) reporting to Nazim

Departments Devolved to Districts

- Health, Education, Agriculture, Social Welfare
- KEPT under provinces: Police, Higher Education, Irrigation, Electricity

Citizen Participation Mechanisms

- Citizen Community Boards (CCBs) — community proposes projects; government funds 80%, citizens 20%
- Zila Mohtasib — district ombudsman for complaints against officials
- Muslihat Committees — local dispute resolution to reduce court burden

Weaknesses

- Non-party elections weakened political accountability
- Provinces opposed devolution
- No sustainable financial autonomy — system largely dismantled after 2007

4. The 18th Amendment (2010) — Article 140A

- Each province MUST establish local government system
- MUST devolve political, administrative, and financial authority
- Local government elections conducted by Election Commission of Pakistan
- First time local governments received CONSTITUTIONAL PROTECTION
- BUT: Provinces retained flexibility in designing their own systems

5. Provincial Structural Comparison (Post-2013 Acts)

Province	Key Feature	Population per Unit	Level of Autonomy
Punjab	Restored urban-rural divide; District Education/Health Authorities under province	10,000–20,000	Low–Medium
Sindh	Mayor has supervisory authority but province retains control; Union Committees in cities	40,000–50,000	Low
KPK	Most decentralized; Village & Neighborhood Councils; 30% dev budget for LGs	2,000–10,000	High
Balochistan	Resembles older structures; Divisional coordination	1,000–1,500	Low

	committees supervise		
--	----------------------	--	--

💡 *KPK has highest autonomy; Sindh has weakest representation ratio (1 rep per 40,000–50,000 people)*

6. Major Persistent Problems

- Provincial dominance over local governments
- Weak financial autonomy — depend heavily on provincial grants
- Limited taxation authority
- Bureaucratic control over administration
- Weak metropolitan governance — Karachi/Lahore need stronger city systems

7. Key Analytical Points (Write These in Exam)

- Party-based elections → stronger political accountability
- Suspension powers → weaken local autonomy
- Financial independence → essential for effective governance
- 2001–2007: Pakistan's HDI improved significantly due to better local service delivery

WEEK 8 — NEO-LIBERAL GOVERNANCE & POVERTY

1. Colonial Roots of Poverty in Pakistan

Poverty's roots trace back to British colonial rule designed to benefit colonizers, not local populations.

- Extraction of resources — cotton, wheat, minerals sent to Britain
- Weak local industries — British goods flooded market, local textile declined
- Agriculture for export — cash crops (cotton, indigo) replaced food crops → food shortages

Key Concept: Accumulation by Dispossession = wealth taken from local populations and transferred to powerful groups

- After independence: Pakistan inherited weak industrial base, lacked financial resources, had to rely on foreign aid

2. Historical Phases of Capitalism

Phase	Period	Key Feature
Mercantilism	16th–18th century	Accumulate gold/silver; establish trade colonies
Industrial Capitalism	19th century	Factories, large-scale production, urbanization
Welfare Capitalism	Post-WWII	Social security, public healthcare, free education
Neoliberal Capitalism	After 1970s	Free markets, privatization, minimal government

Why Neoliberalism Emerged (1970s Crisis)

- Advanced capitalist economies faced overaccumulation — too much capital, not enough profitable investment
- Unemployment increased, growth slowed
- Solution: Expand capitalism to developing countries → Neoliberalism

💡 *Karl Marx: capitalism produces inequality (Bourgeoisie own factories; Proletariat sell labor for wages).
Lenin: capitalism expands globally through imperialism*

3. Accumulation by Dispossession (David Harvey)

Wealth transferred from public to private through government policies.

- Privatization of Public Property — electricity companies, airlines sold to private investors
- Land Dispossession — farmers lose land for industrial zones/housing societies
- Conversion of Public Resources — water, forests, minerals become privately owned
- Commodification of Labor — workers compete for jobs; contract labor replaces permanent jobs
- Debt & Financial Systems — developing countries borrow, budget goes to debt repayment
- Taxation Policies — indirect taxes (sales tax) affect poor MORE than rich

💡 *The STATE enables this by passing laws supporting private ownership, encouraging FDI, implementing privatization*

4. Introduction of Neoliberalism in Pakistan (Late 1980s)

- Adopted due to pressure from IMF and World Bank
- IMF Programs: Stand-By Arrangements (SBA), Structural Adjustment Programs (SAP), PRGF, Extended SAP
- Requirements: Reduce subsidies, increase taxes, privatize state enterprises

5. Three Core Policies of Neoliberalism

1. Liberalization

- Reduce government restrictions — lower tariffs, allow foreign companies
- Pakistan reality: Opened markets while domestic industries were still weak
- Result: Cheap imported goods (especially from China) → local industries closed → unemployment

2. Privatization

- Transfer government businesses to private ownership
- KESC (2005): Privatized due to theft and losses → electricity prices increased, service inconsistent
- PTCL (2006): Sold at low price → thousands of employees lost jobs (Voluntary Separation Schemes)

3. Deregulation

- Remove government rules controlling business — pricing freedom, hiring freedom
- Examples: Removing price controls on fuel, reducing labor protections, eliminating subsidies
- Negative effects: Worker exploitation, environmental damage, monopolies

6. Structural Adjustment Programs (SAPs) — 1990s

- Recommended by IMF and World Bank
- Objectives: Reduce govt spending, privatize enterprises, promote exports, open markets
- Impact: Higher unemployment, reduced welfare, increased poverty

💡 *Government cuts education/healthcare spending to reduce budget deficits — poorest suffer most*

7. Impact on Agriculture

- Fertilizer subsidies reduced; government support for farmers cut
- Competition from imported agricultural goods
- Result: Small farmers → higher costs, lower profits → sold land → moved to cities
- Large corporations began controlling agricultural land

8. Social Structure Under Neoliberalism — 4 Groups

Group	Who	Status
Elite Class	Extremely wealthy; control large businesses; influence politics	Benefits most
Culture of Contentment	Middle-class professionals — corporate employees, bank officers, IT professionals	Benefits from globalization
Vulnerable Workers	Contract workers, daily wage laborers	Unstable income
Marginalized Poor	Slum dwellers, unemployed youth	Excluded from economy

9. Human Insecurity Created by Neoliberalism

- Job insecurity — temporary jobs, layoffs
- Health insecurity — expensive private hospitals
- Education insecurity — high private school fees
- Food insecurity — cannot afford nutritious food
- Environmental insecurity — industrial pollution

10. Recent Poverty Triggers in Pakistan

- Food Inflation: Poor households spend 60–70% income on food → rising prices devastate them
- Energy Prices: Pakistan imports oil → global price rises increase electricity bills, transport fares, production costs

11. Political Resistance — Lawyers' Movement

- Protested against political interference in judiciary
- Key issue: Removal of Chief Justice Iftikhar Muhammad Chaudhry + Steel Mills privatization controversy
- Independent media helped mobilize public opinion
- Outcome: Restoration of judiciary, strengthening of democratic institutions

12. Privatization of Security

- 600+ private security companies operate in Pakistan
- Provide guards, surveillance, protection for businesses

💡 *Even government functions (security) are being transferred to private companies = neoliberal trend*

WEEK 9 — OBSTACLES TO ECONOMIC DEVELOPMENT

1. What is Economic Development?

Continuous improvement in people's lives: better income, more jobs, improved education/healthcare, strong infrastructure, poverty reduction.

- Internal Factors: Weak governance, corruption, poor planning, lack of education
- External Factors: Global crises, political tensions, decline in foreign investment

2. Key Economic Problems (Definitions)

Inflation: Prices of goods/services increase → purchasing power decreases

Budget Deficit: Government spending > income → takes loans → debt increases → less for development

Low Investment: Fewer factories, limited jobs, slower growth

Political Instability: Frequent government changes → investor uncertainty → policies change → long-term planning impossible

3. Historical Economic Journey

Early Years (1947–1960)

- No strong industrial base, few factories, limited banking, weak transport
- Had to build everything from scratch despite inherited British administrative system

1960s — Period of Progress

- GDP growth reached 6.8%
- Why: Strong government planning, industrialization focus, support for private businesses
- Industries: Textile, Cement, Steel → created jobs, increased exports
- Limitation: Non-democratic rule; benefits unevenly distributed; wealth concentrated

After 1971

- Separation of Bangladesh → loss of population, markets, industrial capacity
- Political instability increased; long-term projects delayed

1990s Reforms

- Privatization — sold industries to private owners
- Trade Liberalization — reduced trade barriers
- Deregulation — reduced business controls

4. Agricultural Sector Problems

Agriculture = backbone of economy. Supports food supply, employment, and industrial raw materials.

Water Scarcity

- Melting glaciers (climate change), poor irrigation, water wastage, unequal distribution
- Result: Crops fail, farmers suffer losses

Poor Agricultural Management

- Lack of farmer education, weak research, poor fertilizer distribution

Natural Disasters

- 2010 floods: millions homeless, crops destroyed, roads collapsed, billions in economic loss

Traditional Methods

- Outdated techniques → low crop yield, high water usage, inefficient land use

5. Circular Economy Concept

Traditional Economy	Circular Economy
Use → Dispose	Use → Reuse
Waste increases	Waste decreases
High cost	Cost-efficient

- Pakistan struggles with: lack of recycling plants, poor waste collection, low awareness
- Benefits: Saves energy, reduces pollution, creates recycling jobs

6. Internal Obstacles

SMEs (Small & Medium Enterprises)

- Problems: High interest rates, lack of technology, poor marketing → cannot compete globally

Labor Market

- Low literacy, lack of technical education, brain drain (skilled workers leave country)

Tax Evasion

- Complex tax system, lack of trust in government, weak enforcement

Regional Inequality

- Karachi, Lahore, Islamabad have better facilities than rural areas
- Result: Rural-to-urban migration → overpopulation in cities

Corruption and Bureaucracy

- Increases cost of doing business, discourages investors, slows decisions

7. External Obstacles

- Political Instability → investors prefer stable countries
- Terrorism → increases risk, reduces investment
- Weak Governance → poor project management, delays
- Foreign Policy Challenges → relations with India affect trade
- Low FDI → investors want stability, security, profit opportunities

8. Infrastructure & Macro Risks

- Poor roads, energy shortages, weak transport → high production cost
- Inflation + Debt + Fiscal deficits → uncertainty
- Banks prefer large businesses → small businesses underdeveloped
- Slow Diversification: Pakistan relies heavily on textile exports → vulnerable to demand changes

9. COVID-19 Example

- Businesses closed, trade slowed, unemployment increased

10. What Pakistan Needs

- Strong and stable governance
- Investment in education and skills
- Better infrastructure
- Support for industries and SMEs
- Promotion of circular economy practices

WEEK 10 — FOREIGN POLICY & STRATEGIC SIGNIFICANCE

1. What is Foreign Policy?

How a country deals with other countries — all decisions, plans, and actions to protect national interests at the international level.

- Political Relations: Agreements, treaties, diplomatic visits, embassies
- Economic Relations: Trade, imports/exports, loans, foreign investment
- Military Relations: Defense agreements, arms deals, alliances
- Cultural Relations (Soft Power): Education exchange, media, cultural programs

Key Features

- Dynamic (Changing) — shifts with global situations (e.g., Pakistan's shift from USA to China)
- Interest-Based — every decision protects national interest

Core Principle: 'There are no permanent friends or enemies, only permanent interests'

2. National Interest

Primary (Vital) Interests — Cannot be compromised

- Survival of the state, Protection of borders, National security and defense

Secondary Interests — Flexible

- Trade and economic growth, Diplomatic relations, International reputation

3. Pakistan's Foreign Policy — Main Goals

- Protect sovereignty and territorial integrity
- Build strong and stable economy
- Develop friendly relations with all countries
- Gain international recognition and respect
- Promote peace and cooperation

Phases of Pakistan's Foreign Policy

- Early Years: Depended on Western countries
- Cold War: Joined SEATO and CENTO (aligned with USA)
- Post-1971: Focused on rebuilding after Bangladesh
- Modern Era: Strong partnership with China (CPEC)

4. Indian Factor

India is the MOST IMPORTANT factor influencing Pakistan's foreign policy since independence.

- Kashmir dispute (core issue since 1947)
- Major Wars: 1948 (Kashmir), 1965 (Full-scale), 1971 (Bangladesh)
- 1998: Both countries tested nuclear weapons
- 2019: India removed Article 370 → increased military control in Kashmir
- Pulwama incident → Balakot airstrike → Pilot Abhinandan captured

- Effect on Pakistan: Heavy defense spending, need for powerful alliances, nuclear deterrence

5. Determinants of Foreign Policy

Factor	Explanation	Example
National Security	Protection from external (India) and internal (terrorism) threats	Heavy defense spending
Economic Factor	Strong economy = strong foreign policy; weak = dependence	IMF loans, CPEC
Ideological Factor	Islamic ideology; unity among Muslim countries	OIC membership
Historical Factor	Past conflicts influence present decisions	India-Pakistan rivalry
Geographical Factor	Connects South Asia, Central Asia, Middle East	Gwadar Port as trade hub

6. Principles of Pakistan's Foreign Policy

- Islamic Unity — strengthen relations with Muslim countries
- Good Relations with Neighbors — important for peace and development
- Peace — avoid war, solve through dialogue
- Self-Determination — support Kashmir, Palestine
- Peaceful Co-existence — respect sovereignty, no interference
- United Nations — follow international law, participate in peacekeeping
- Independent Policy — balance relations with major powers

7. Foreign Policy Making — Who Decides?

- Administrative Troika: Prime Minister + President + Army Chief → major decisions
- Foreign Ministry — handles diplomacy, manages relations
- Intelligence Agencies — provide security information
- Political Parties — influence foreign policy, represent public opinion
- Parliament — debates foreign policy, ensures accountability

8. Geo-Strategic Importance of Pakistan

Pakistan is a BRIDGE connecting South Asia, Central Asia, Middle East, and China.

- Close to oil-rich Middle East
- Near Central Asia with gas and energy resources
- Shares borders: India (rival), China (friend), Afghanistan (conflict zone)
- Access to Arabian Sea → Gwadar Port → trade hub

Advantages	Disadvantages
Trade opportunities through location	Foreign interference in domestic affairs
Foreign investment attraction	Security threats from neighboring conflicts
Strategic importance globally	Involvement in global conflicts

9. Pakistan in Global Conflicts

Cold War Era

- Cold War: USA vs USSR — no direct war, political/military competition
- Pakistan supported USA → joined SEATO and CENTO
- Why: Needed economic help + security against India
- Effect: Got military/economic aid but became dependent on USA

War on Terror (Post 9/11)

- Background: 9/11 attacks → USA attacked Afghanistan
- Pakistan supported USA — allowed military operations, provided bases and intelligence
- Why joined: US pressure, to avoid being declared enemy, to get economic aid
- Negative Effects: Rise of TTP, thousands killed, billions in economic losses, social problems
- APS Peshawar attack = showed severity of terrorism
- Pakistan's Response: Military operations (Zarb-e-Azb, Radd-ul-Fasaad), border fencing

Afghan War Impact

- Millions of Afghan refugees → burden on economy
- Drug trafficking spread, militancy crossed into Pakistan
- Drone attacks by USA → violated Pakistan's sovereignty, civilian deaths

 *Peace in Afghanistan = Peace in Pakistan — long shared border, direct security impact*

Post-US Withdrawal (2021)

- USA left Afghanistan, Taliban took control
- Effects on Pakistan: Border insecurity, fear of instability, cross-border attacks increased

10. Role of Global Powers

Power	Role in Pakistan	Key Issue
United States	Ally in Cold War and War on Terror	Trust issues, pressure on Pakistan
China	Strongest ally — CPEC, Belt and Road Initiative	Economic development, balances India
Both	Pakistan BALANCES relations between USA and China	Competing interests managed diplomatically

11. CPEC — Key Economic Opportunity

- China-Pakistan Economic Corridor
- Roads and infrastructure, jobs and investment, economic growth
- Gwadar Port: Connect China and Central Asia to international markets
- Challenge: Political instability slows CPEC projects

12. Pakistan's Future Needs

- Strong economy — prerequisite for strong foreign policy
- Political stability — attracts investment and credibility
- Better governance — implements development projects
- Independent and balanced foreign policy
- Peaceful relations with neighbors (especially India and Afghanistan)

⚡ EXAM CHEAT SHEET — READ BEFORE ENTERING HALL ⚡

Pakistan Studies | Week 5 to Week 10 | Quick Recall

WEEK	TOPIC	KEY POINTS TO REMEMBER
W5	Democracy in Pakistan	3 martial laws: Ayub (1958), Zia (1977), Musharraf (1999). 6 PMs in 7 yrs after Liaquat. 1973 Constitution = Bhutto's biggest achievement. 18th Amendment (2010) = PPP's landmark, restored parliamentary supremacy. Democracy = resilient but fragile.
W5	Types of Democracy	Direct (Switzerland referendums), Representative (Pakistan — NA, Senate, Provincial), Social (Ehsaas Program). Core principles: Popular Sovereignty, Rule of Law, Separation of Powers.
W7A	New Provinces	4 current provinces. Article 239(4): 2/3 majority needed in Parliament + concerned Provincial Assembly. One Unit (1955–70) failed. FATA merger (2018) = success story. No new province since 1970 — main reason: lack of political consensus.
W7A	Province Demands	South Punjab (Multan/Bahawalpur/DGK — dev gap + marginalization). Hazara (renamed KPK 2010 → Hindko people protested). Seraiki (linguistic demand). Urban Sindh/Muhajir (Karachi/Hyderabad tax revenue argument). Bahawalpur (princely state restoration).
W7B	Local Govt Systems	3 major systems: Ayub 1959 (Basic Democracies — electoral college for president), Zia 1979 (rural/urban separate), Musharraf 2001 (Devolution — district nazim, CCBs, Zila Mohtasib). 18th Amendment Article 140A = constitutional protection for local govts.
W7B	Provincial LG Compare	KPK = most decentralized, 2,000–10,000 per unit, 30% dev budget. Sindh = weakest (40,000–50,000 per unit). Punjab = medium. Balochistan = heavy provincial supervision. Party-based elections = stronger accountability.
W8	Neoliberalism	3 core policies: Liberalization + Privatization + Deregulation. Pakistan adopted in late 1980s under IMF/World Bank pressure. KESC privatized 2005 (prices rose). PTCL privatized 2006 (employees lost jobs). SAPs (1990s) → cut education/health spending → poverty rose.
W8	Key Concepts	Accumulation by Dispossession (David Harvey) = wealth transferred from public to private. 4 social groups: Elite → Culture of Contentment → Vulnerable Workers → Marginalized Poor. Lawyers' Movement = resistance against privatization/judicial interference.
W9	Economic Obstacles	Internal: Corruption, low investment, tax evasion, brain drain, regional inequality, weak SMEs. External: Political instability, terrorism, low FDI, India conflict. 1960s = best period (6.8% GDP). 2010 floods = worst disaster. Heavy textile dependence = vulnerability.
W9	Agriculture	Water scarcity (glaciers, poor irrigation). Traditional methods. Natural disasters (2010 floods). Poor management. Circular Economy: Use→Reuse vs traditional Use→Dispose. Pakistan lacks recycling infrastructure.
W10	Foreign Policy	Definition: How country deals with others to protect national interests. Features: Dynamic + Interest-based. 'No permanent friends/enemies, only permanent interests.' 3 makers: PM + President + Army Chief (Administrative Troika). Phases: Western alliance → SEATO/CENTO → CPEC.
W10	Strategic Significance	Bridge: South Asia + Central Asia + Middle East + China. Gwadar Port = key trade hub. Cold War: joined SEATO/CENTO (pro-USA). War on Terror: bases/intelligence

		for USA → terrorism rose (TTP, APS attack). Zarb-e-Azb + Radd-ul-Fasaad = counter-ops. Post-2021: Taliban in Afghanistan = border instability.
W10	India Factor	Biggest external threat since 1947. Wars: 1948, 1965, 1971. Kashmir = core dispute. 1998 nuclear tests by both. 2019: Article 370 removed. Pulwama → Balakot → Abhinandan. CPEC + China = balance against India.
